REACH Regulation EG No. 1907/2006

WEHNER kontakt-technik GmbH acts as a distributor with products, which are goods in the sense of chemicals law.

The products are sourced from European and non-European suppliers.

We are therefore subject to our information obligations to our customers in accordance with article 33 of the REACH Regulation, if included in one of our deliveries a substance of very high concern (SVHC substance) in a mass concentration above 0.1 percent.

The list of SVHC substances is expanded twice a year and is available on the web page of the European Chemicals Agency (ECHA) at <https://echa.europa.eu/de/candidate-list-table>.

The European Chemicals Agency (ECHA) added a new substance to the SVHC candidate list on June 10, 2022 due to its carcinogenic and mutagenic properties.

The new substance on the list is

- N-(hydroxymethyl)acrylamide CAS-Nr. 924-42-5

In our own interest and against the background of a high supply and product safety, we take these information obligations very seriously. The legal process according to Art. 33 of the REACH regulation we comply with following procedure:

- Our EU suppliers of products are obliged to inform us unsolicited and without delay, if in the products they supply an SVHC substance above 0.1 mass percentage is included. Unless we receive such an information from our suppliers you will be informed immediately according to article 33 of the REACH regulation.
- With all non-EU suppliers of products we arrange separate agreements because they do not comply with the REACH information obligations automatically. That's why we leave non-EU suppliers assure in writing that we will be informed immediately, if in one supplied product the 0.1 mass percentage threshold for a SVHC substance is exceeded.
- From today's perspective and against the background of the information of our suppliers the use of SVHC substances in our products contained in a mass concentration over 0.1 percent is not expected.

Should you have additional questions about the implementation of the REACH regulation in our company, we are at your disposal for further information.
